## ★ The owner that appointed admins cannot be promoted by the admins after leaving the group and coming back

 Priority Major  Type Bug  Bug Severity Major F Bug Type Functional  State Opened  Assignee ---

### Steps to reproduce:

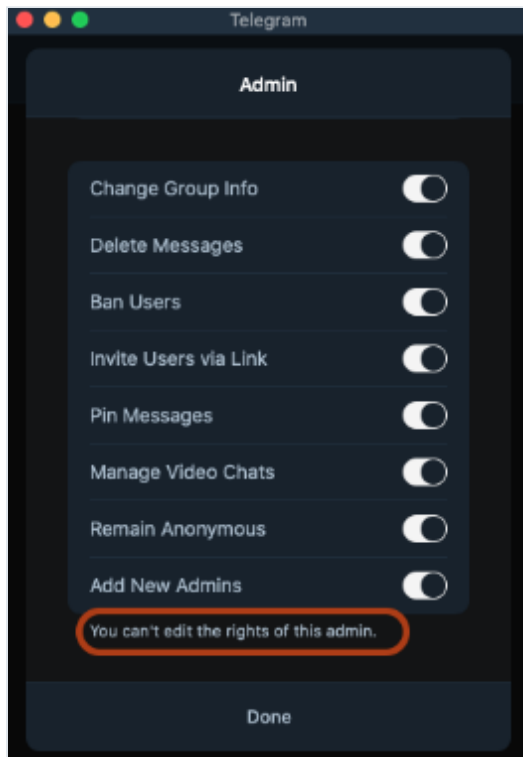

1. Open the Telegram App on a mobile device, login as a valid user;
2. Create a private group in Telegram and add two people from contacts to the group, promote them to admins, giving them the rights to send messages by group name anonymously:

3. Leave the group and request the admin to send the invitation;
4. Join the group;
5. Switch to the Admin account and promote the returned owner to admin.

### Results:

While being present in the Admins list, the returned owner has no rights to promote his/her account as well as edit the rights of the other two admins. The other admins also have not rights to promote the owner's account as well as edit the rights of the other admins.

### Expected Results:

The returned owner and the admins can edit other admin's rights.
