★ In the private group the member counter shows invalid information

 Priority Normal  Type Bug  Bug Severity Normal F Bug Type Functional  State Opened  Assignee ---

Environment:

Apple iPhone 11, iOS 15.5

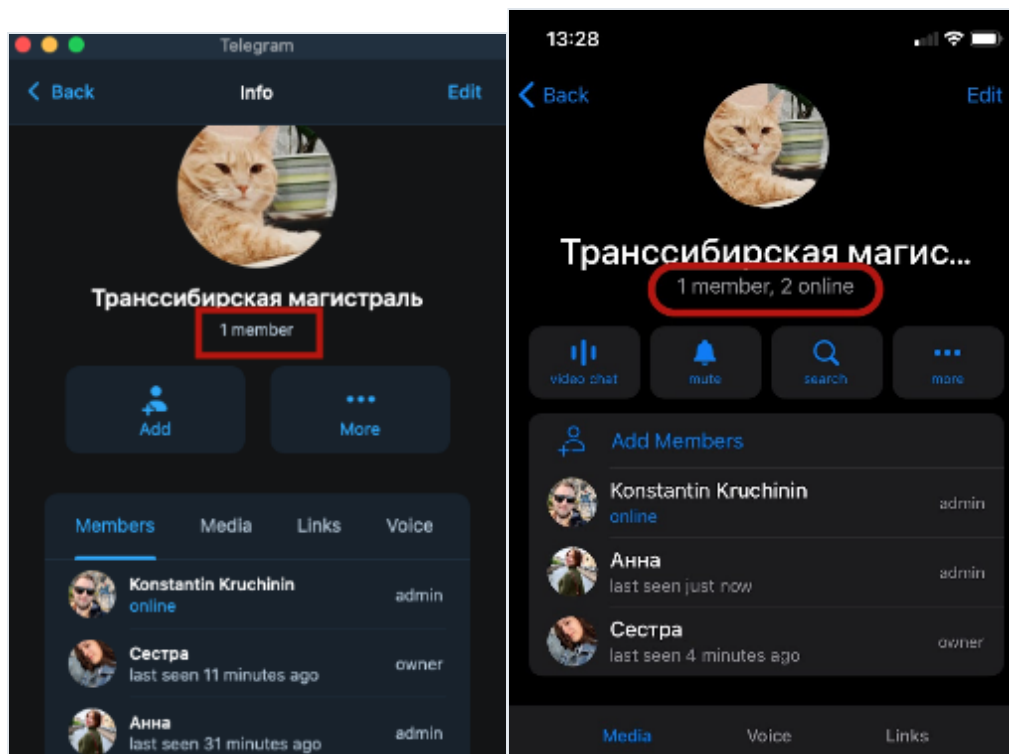

MacBook Pro (15-inch, Mid 2012), macOS Catalina (10.15.7)

Steps to reproduce:

1. Open the Telegram App on a mobile device, login as a valid user;
2. Open the Telegram Desktop on MacBook Pro;
3. Create a private group in Telegram and add two people from your contacts to the group;
4. Go to the group info both on mobile device and MacBook Pro.

Results:

The information in the member counter does not match with the actual list of members (3 members, 1 online) both in mobile and desktop apps.

Expected Results:

The information in the member counter matches with the actual number of group members.
